

PHP

Problem statement 1-Create a web page to maintain a session using PHP

SOURCE CODE:

```
<?php
session_start();
if(isset($_GET['logout'])) {
    session_unset();
    session_destroy();
    header("Location:
    q1.php"); exit();
}

if(isset($_POST['login'])) {
    $_SESSION['user'] = $_POST['username'];
}
?>

<!DOCTYPE html>
<html>
    <head>
        <title>PHP SESSION EXAMPLE</title>
    </head>
    <body>

    <?php
```

```

if(isset($_SESSION['user'])) {
    ?>

    <h2>Welcome <?php echo $_SESSION['user']; ?> </h2>
    <p> Session is active.</p>

    <a href="q1.php?logout=true">Logout</a>
    <?php
} else{
    ?>
    <h2>Login Page</h2>
    <form method="POST">

        Enter Username: <input type="text" name="username" required>

        <br><br>
        <input type="submit" name="login" value="Login">
    </form>
<?php
}
?>

</body>
</html>

```

OUTPUT:

Welcome Apratim Rana

Session is active.

[Logout](#)

Problem statement 2-Create a program to write & retrieve cookies.

Source code:

```
<?php

if(isset($_POST['setcookie'])) {
    $username=$_POST['username'];

    setcookie("user" , $username , time() + 3600);

    echo "Cookie has been set!<br>";
}

if(isset($_POST['deletetecookie'])
) { setcookie("user", "", time()
- 3600); echo "Cookie
deleted!<br>";
}
?>

<!DOCTYPE html>

<html>

<head>

<title>Cookie Exapmle</title>

</head>

<body>
```

```

<h2>Cookie preview</h2>
<form method="POST">

    Enter name: <input type="text" name="username" required>

    <br><br>

    <input type="submit" name="setcookie" value="Set Cookie">
</form>

<br>
<form method="POST">

    <input type="submit" name="deletecookie" value="Delete Cookie">
</form>
<br>

<?php
if(isset($_COOKIE['user'])) {
    echo "<h3>Welcome " . $_COOKIE['user'] . "</h3>";
} else {
    echo "<h3>No Cookie found</h3>";
}
?>

</body>
</html>

```

Enter name: <input type="text" name="username" required>

<input type="submit" name="setcookie" value="Set Cookie">

</form>

<form method="POST">

<input type="submit" name="deletetecookie" value="Delete Cookie">

</form>

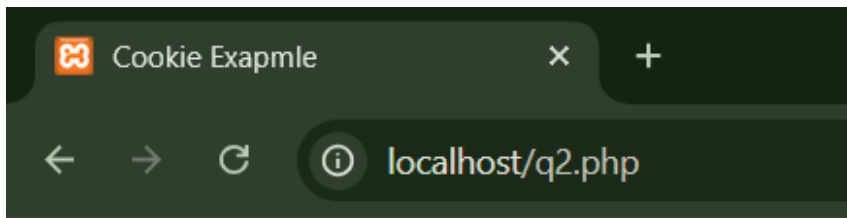

<?php

```
if(isset($_COOKIE['user'])) {  
    echo "<h3>Welcome " . $_COOKIE['user'] . "</h3>";  
} else {  
    echo "<h3>No Cookie found</h3>";  
}  
?>
```

</body>

</html>

OUTPUT:

Cookie has been set!

Cookie preview

Enter name:

Welcome admin

Problem statement 3-Write a PHP program to store page views count in SESSION, to increment the count on each refresh, and to show the count on web page.

SOURCE CODE:

```
<?php session_start();

if(isset($_SESSION['page_counter'])) {
    $_SESSION['page_counter']++;
}
else{
    $_SESSION['page_counter']=1;
}

?>

<!DOCTYPE html>

<html lang="en">

    <body>

        <h1>Page Counter</h1>

        <p>You have visited this page <?php echo $_SESSION['page_counter']; ?>
        times.</p>

    </body>

</html>
```

OUTPUT:

Page Counter

You have visited this page 4 times.

Problem statement 4-Write a PHP program to store current date-time in a COOKIE and display the "Last visited on date-time on the web page upon reopening of the same page.

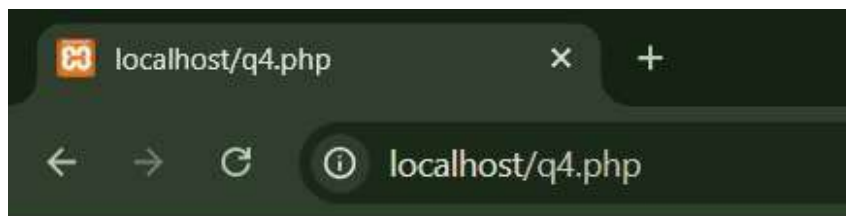

SOURCE CODE:

```
<?php
if(isset($_COOKIE['last_visit'])) {
    $last_visit = $_COOKIE['last_visit'];
    echo "Last visited on: " . $last_visit . "<br>";
} else {
    echo "This is your first visit!<br>";
}

$current_time = date("Y-m-d H:i:s");

setcookie("last_visit", $current_time, time() + 86400);
?>
```

OUTPUT:

Last visited on: 2026-04-27 06:50:28

Problem statement 5-Using PHP and MySQL, develop a program to accept book information viz. Accession number, title, authors, edition and publisher from a web page and store the information in a database and to search for a book with the title specified by the user and to display the search results with proper headings.

SOURCE CODE:

```
<?php

$conn = new mysqli("localhost", "root", "", "library");

if ($conn->connect_error) {
    die("Connection failed: " . $conn->connect_error);
}

if (isset($_POST['add'])) {
    $acc = $_POST['acc'];
    $title = $_POST['title'];
    $authors = $_POST['authors'];
    $edition = $_POST['edition'];
    $publisher = $_POST['publisher'];

    $sql = "INSERT INTO books VALUES
    ('$acc','$title','$authors','$edition','$publisher')";

    $conn->query($sql);

    echo "Book Added Successfully<br><br>";
}
```

```

$result = null;
if (isset($_POST['search'])) {
    $search = $_POST['search_title'];
    $sql = "SELECT * FROM books WHERE title LIKE '%$search%'";
    $result = $conn->query($sql);
}
?>

```

```

<!DOCTYPE html>
<html>
<head>
    <title>Library System</title>
</head>
<body>

<h2>Add Book</h2>
<form method="POST">
    Accession No: <input type="number" name="acc" required><br><br> Title:
    <input type="text" name="title" required><br><br>
    Authors: <input type="text" name="authors"
    required><br><br> Edition: <input type="text"
    name="edition"><br><br> Publisher:
    <input type="text" name="publisher"><br><br>
    <input type="submit" name="add" value="Add Book">
</form>

```

```
<hr>
```

```
<h2>Search Book</h2>
```

```
<form method="POST">
```

```
    Enter Title: <input type="text" name="search_title" required>
```

```
    <input type="submit" name="search" value="Search">
```

```
</form>
```

```
<br>
```

```
<?php
```

```
if ($result && $result-
```

```
    >num_rows > 0) { echo
```

```
    "<h3>Search Results</h3>";
```

```
    echo "<table border='1'>
```

```
        <tr>
```

```
            <th>Accession No</th>
```

```
            <th>Title</th>
```

```
            <th>Authors</th>
```

```
            <th>Edition</th>
```

```
            <th>Publisher</th>
```

```
        </tr>";
```

```

while ($row = $result-
    >fetch_assoc()) { echo "<tr>
        <td>{$row['accession_no']}</td>
        <td>{$row['title']}</td>
        <td>{$row['authors']}</td>
        <td>{$row['edition']}</td>
        <td>{$row['publisher']}</td>
    </tr>";
}

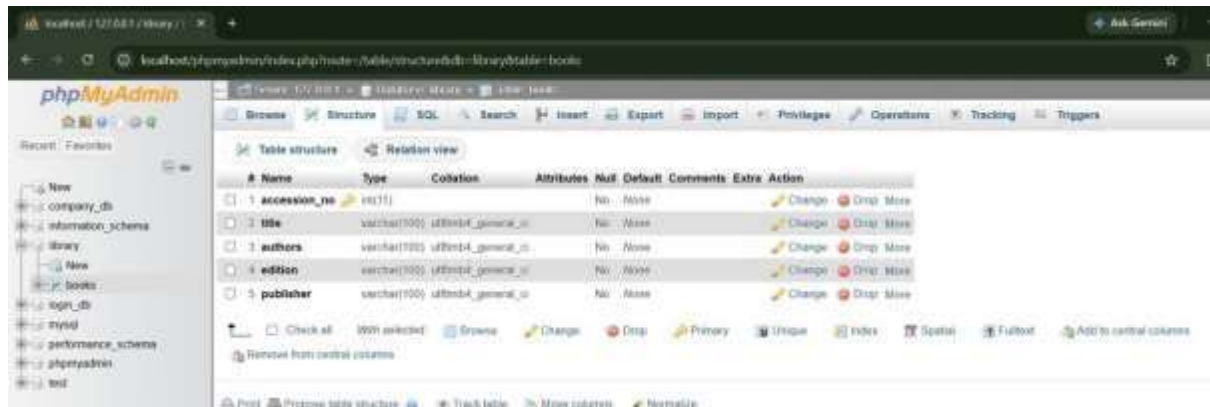

echo "</table>";
} elseif
    (isset($_POST['search'])) {
    echo "No records found";
}

$conn->close();
?>

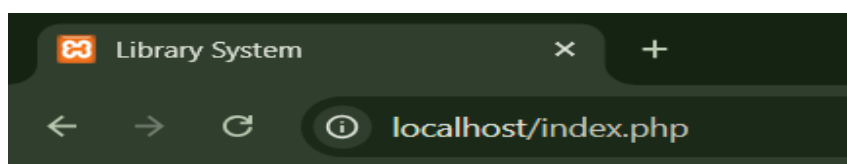

</body>
</html>

```

USING PHPMYADMIN TO CREATE A DATABASE:

OUTPUT:

Add Book

Accession No:

Title:

Authors:

Edition:

Publisher:

Search Book

Enter Title:

Search Results

Accession No	Title	Authors	Edition	Publisher
4	FSWD	AMAN	3	NCERT

Problem statement 6-Create a login form with fields for User ID and Password. Upon form submission, validate the entered credentials by matching them with existing records. If the User ID and Password are correct, display a new welcome page.

SOURCE CODE:

LOGIN.PHP

```
<?php session_start(); ?>
```

```
<!DOCTYPE html>
```

```
<html>
```

```
<body>
```

```
<h2>Login Form</h2>
```

```
<form method="POST" action="check.php">
```

```
    User ID: <input type="text" name="user_id"><br><br> Password:
```

```
    <input type="password" name="password"><br><br>
```

```
    <input type="submit" value="Login">
```

```
</form>
```

```
</body>
```

```
</html>
```

CHECK.P

HP

```
<?php session_start();
```

```
$conn = new mysqli("localhost", "root", "", "login_db");
```

```

$user = $_POST['user_id'];

$pass = $_POST['password'];
$sql = "SELECT * FROM users WHERE user_id='$user' AND
password='$pass'";
$result = $conn->query($sql);
if ($result->num_rows > 0) {

    $_SESSION['user'] = $user;

    header("Location:
welcome.php");
} else {
    echo "Invalid User ID or Password";
}
?>

```

WELCOME.PHP

```

<?php
session_start
();
if (!isset($_SESSION['user'])) {
    header("Location: login.php");
}
?>

<!DOCTYPE html>
<html>
<body>

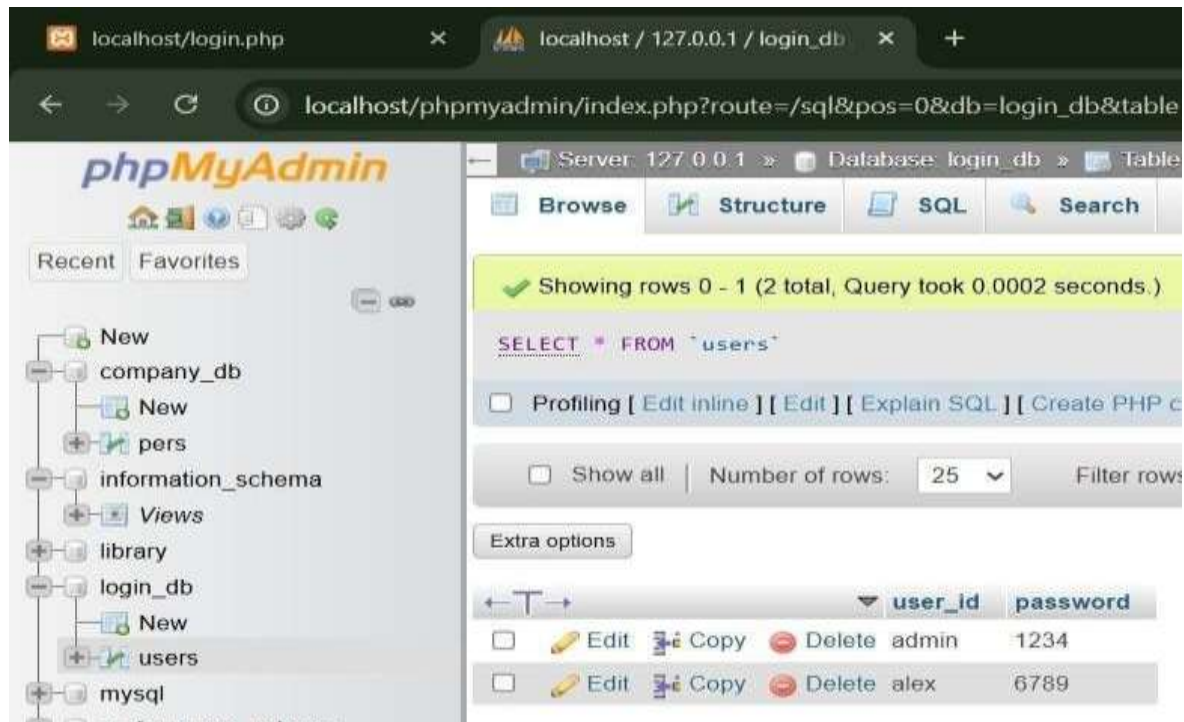

<h2>Welcome <?php echo $_SESSION['user']; ?>!</h2>

```

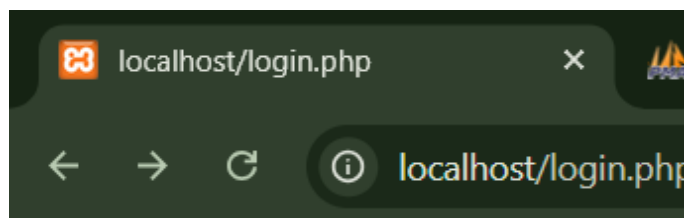

</body>

</html>

USING PHPMYADMIN TO MAKE A DATABASE:

OUTPUT:

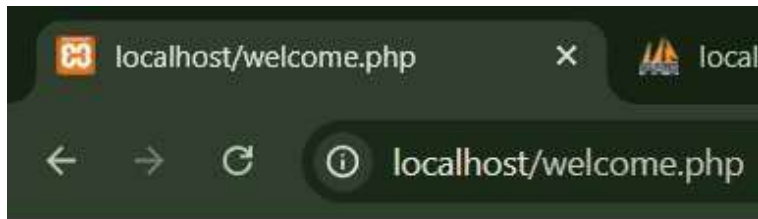

Login Form

User ID:

Password:

OUTPUT:

Welcome admin!

Problem statement 7-Create a PHP page that displays all records from the PERS table where the Department Number (dno) matches one of the values listed on the web interface.

SOURCE CODE:

```
<?php
$conn = new mysqli("localhost", "root", "", "company_db");

if ($conn->connect_error) {
    die("Connection failed: " . $conn->connect_error);
}
?>

<!DOCTYPE html>
<html>
<head>
    <title>PERS Records</title>
</head>
<body>

<h2>Select Department Number</h2>

<form method="POST">
    <select name="dno">
        <option value="1">1</option>
        <option value="2">2</option>
        <option value="3">3</option>
    </select>

    <input type="submit" name="submit" value="Show Records">
```

```
</form>
```

```
<?php
```

```
if(isset($_POST['submi
```

```
t'])) {
```

```
    $dno = $_POST['dno'];
```

```
    $sql = "SELECT * FROM PERS WHERE dno = '$dno'";
```

```
    $result = $conn->query($sql);
```

```
    if($result->num_rows
```

```
        > 0) { echo
```

```
        "<h3>Results:</h3>"
```

```
        ; echo "<table
```

```
        border='1'>
```

```
            <tr>
```

```
                <th>ID</th>
```

```
                <th>Name</th>
```

```
                <th>Age</th>
```

```
                <th>DNO</th>
```

```
            </tr>";
```

```

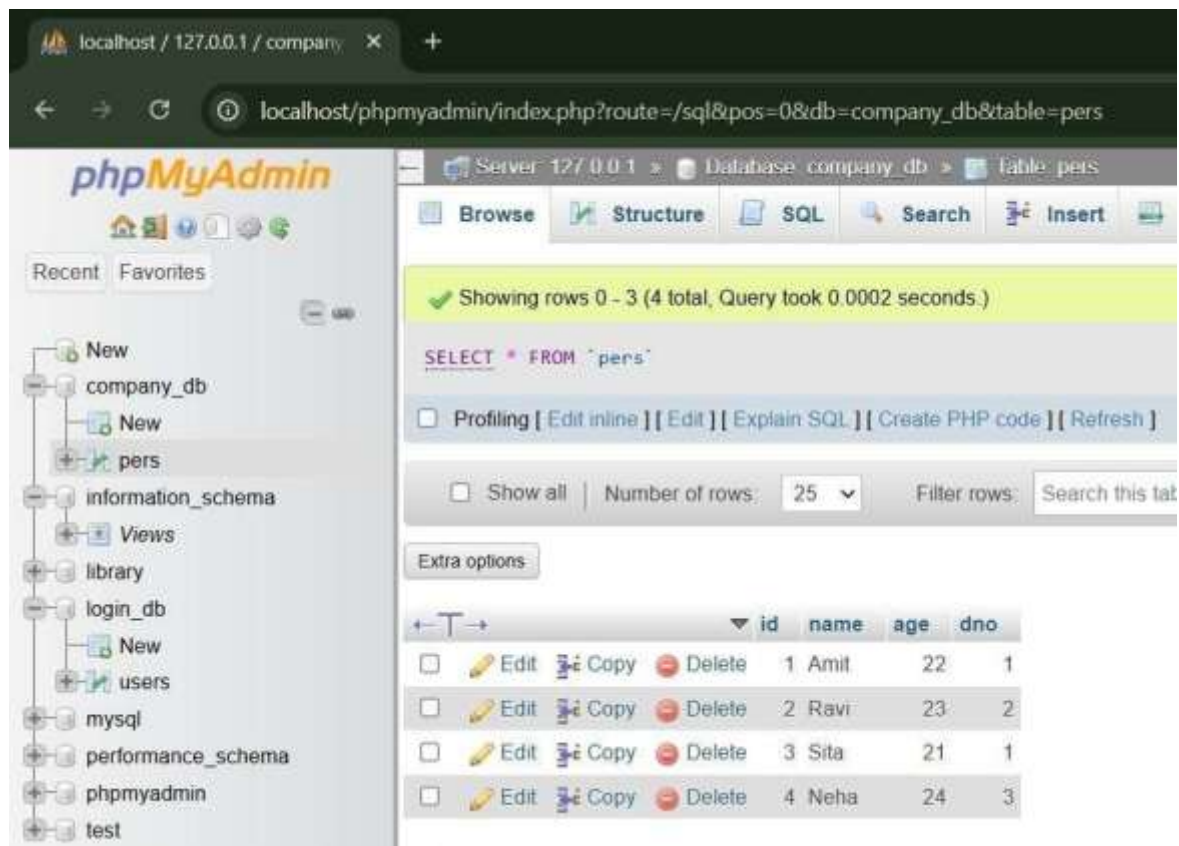

while($row = $result-
    >fetch_assoc()) { echo "<tr>
        <td>".$row['id']. "</td>
        <td>".$row['name']. "</td>
        <td>".$row['age']. "</td>
        <td>".$row['dno']. "</td>
    </tr>";
    }

    echo "</table>";
} else {
    echo "No records found!";
}
}
?>

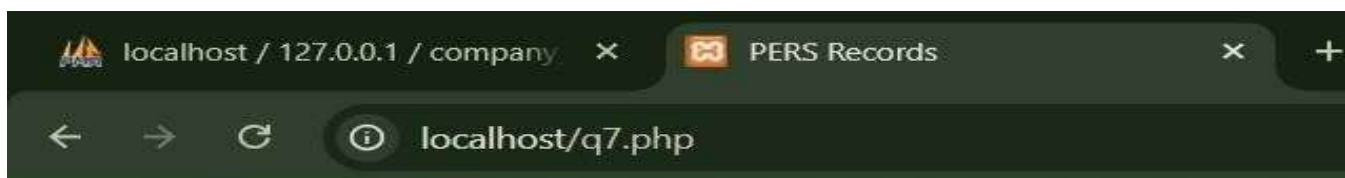

</body>
</html>

```

USING PHPMYADMIN TO MAKE A DATABASE:

OUTPUT:

Select Department Number

1 ▼ Show Records

Results:

ID	Name	Age	DNO
1	Amit	22	1
3	Sita	21	1
